

Data Structures & Algorithms â€¢ End-Semester University PYQ

Subject: CS301 | End-Term Exam

1. Executive Overview & Syllabus Scope

End-semester previous year question paper covering recursion trees, AVL rotations, Heapify, Dijkstra, and DP Knapsack problems.

2. Key Architectural Invariants & Core Topics

â€¢ Lecture Modules & Key Topics

- DSA End-Semester Question Paper Year 2022-23
- Questions on AVL Tree single and double rotations LL, RR, LR, RL
- Dynamic Programming 0/1 Knapsack recursive and memoized recurrence relation
- Shortest path algorithms comparison and time-complexity trade-offs

3. University Exam Tips & High-Yield Checklist

- * Practice numerical problems and time complexity derivations under timed conditions.
- * Draw neat labeled block diagrams for full credit in subjective university evaluations.
- * Use AI_Book Quiz & Summary features to test active recall before mid-terms and finals.
